**Amended C102s**

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof.

If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Through OCD inspection and file review, it was determined that the footages and coordinates originally assigned to the subject well were incorrect. As such, Hilcorp Energy resurveyed the well location. The first submission of these resurveys were denied due to incorrect dedicated acres. Please see the attached revised C-102s with the correct dedicated acres, footages, and coordinates.
