13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Questar Exploration & Production is advising the BLM our intent to temporarily abandon the well due to a casing leak. We will attempt to isolate the currently open Dakota with a CIBP and squeeze off the casing leak; we will start work within 60 days depending on rig availability. We are currently evaluating it for a recompleat attempt in the Gallup and/or Mancos. A detailed procedure will follow before any work starts.

Please contact us should you have any questions.
