(Note: Report results of multiple completion on Well  
Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The Dakota formation was perforated 6270'-74', 6282'-87' & 6350'-54' and broken down with 750 gallons 15% HCL acid. Subsequent swab testing recovered only gas cut water and no oil. We plan to set a CIBP at 6190' and proceed with completion efforts in the Gallup. The downhole commingling of the Gallup and Dakota as proposed in our application dated 1-23-06 is no longer needed and our application is now withdrawn.
