Commingle Allocation Calculations

OIL

The Basin Fruitland Coal gas pool does not make any oil in the vicinity of the subject well. The East Blanco Pictured Cliffs gas pool does produce a little oil. Therefore, any and all oil will be assigned to the Pictured Cliffs.

GAS

During workover operations in July & August 2005, stabilized choke gas tests were taken on the FRTC alone, then on the FRTC and Pictured Cliffs together.

Choke gas test on FRTC alone: 47 MCF/D.

Choke gas test on Pictured Cliffs and FRTC together: 145 MCF/D.

Total gas = 47 + 145 = 192 MCF/D.
