13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The subject well was recently completed into the Dakota formation with the intent to downhole commingle with the Mesaverde. Upon completion of the Dakota it was noted that the well was located on the same 40 acre tract as the Childers # 1E. The subject well was subsequently shut-in pending NMOCD approval of a density exception. It is our intent temporarily abandon the Dakota by setting a CIBP @ 5400' and complete into the Mesaverde formation with the intent to produce the well as a single Mesaverde completion pending the results of NMOCD hearing for a density exception for the Dakota formation. If density exception is granted we will drill out the CIBP & proceed with downhole commingling. If density exception is denied the CIBP will remain in place pending the depletion of well # 1E.
