13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The subject well is presently open to produce from the upper coal seams of the Fruitland Coal formation. It is our intent to produce the well pending the anticipated downspacing order to 160 acres. The lower coal seam will be exposed by drilling out the CIBP currently set @ 3198', squeezing the PC perforations from 3248-3275' and perforating the basal Fruitland Coal from 3287-3302'. No stimulation will be performed pending evaluation.
