13. Describe Proposed or Completed Operation (clearly state all pertinent details including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths or pertinent markers and sands. Attach the Bond under which the work will performed or provide the Bond No. on file with the BLM/ BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notice shall be filed only after all requirements, including reclamantion, have been completed, and the operator has determined that the site is ready for final inspection.)

The packer was set @ 2410' to isolate the Basin DK and the Basin FC formations.

Note to NMOCD:

Patina San Juan, Inc. seeks an exception to NMOCD rule 19.15.3.112.C.1.b.

Patina is requesting a variance to the 100' rule for the packer depth. The well has been set up for a plunger lift system to aid in the optimization of production. By placing the packer as high as possible, the added volume in the annulus will help create the energy needed to lift the plunger during cycles. We believe that this type of operation will eliminate the necessity of having to vent the well to get the plunger to the surface.

14. I hereby certify that the foregoing is true and correct.
