13. Describe Proposed or Completed Operations

The directional plan will be slightly modified from the version submitted to the BLM. While performing final preparations, we noticed a typo in the Northing/Easting assigned to the surface hole location. The Lat/Long coordinates are correct, but the plan was designed using the X/Y coordinates. As a result, the reach and azimuth of the plan are not right.

The new well plan will call for setting the 7" casing at a measured depth of 4901' at a horizontal reach of 1425' in an azimuth of 161.37 degrees from the surface location. 4 1/2" casing will be set at a TMD of 8258'.

No surface or bottom hole locations have been moved. The changes above simply reflect the CORRECT means of reaching our desired target.

Please see the attached survey for details.
