13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well was approved to drill (APD approved 4/28/06), showing the W/2 of Sec 29 as the dedicated acreage. BLM required this well bore to be moved (twice) further east in order to avoid a stand of trees. Under NMOCD rules, the (footage) placement of this well now deems it a NSL, or non-standard location. SG is requesting the dedicated acreage be changed to the S/2 of Section 29, Township 21 North, Range 6 West.
