13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In conjunction with previously approved Sundries of well work and DHC (DHC 1473AZ) of Basin Fruitland Coal (71629) and Blanco Pictured Cliffs (72359) Pools, Four Star Oil & Gas Company anticipates increases in production volumes necessitating installation and modification of existing surface production facilities. This includes replacing and up-sizing of the existing separator and meter run, installing a dual flow line, possible installation of artificial lift equipment, and installing a 400 Bbl water tank. Upon evaluation of resulting produced volumes and water capacity issues, a determination will be made of which tanks will be necessary for production purposes which may further result in removal of the existing FG 95 Bbl water tank. Currently there is one 2-phase separator, one FG 95 Bbl water tank and a meter run existing on location.

Your approval of this request to install and upgrade these surface facilities will enhance the environmental and economic capabilities of this well and lease.
