RE: New Well  
Hampton D #1E 30-045-33948  
Township 30 North, Range 11 West, NMPM  
Section 10  
San Juan County, New Mexico

Dear Sir;

As a courtesy to our neighbors, XTO is notifying you that we will began to move our equipment on to this well site on or about October 23, 2006.

This is a new well to be drilled just east of Kokopelli subdivision in Aztec, New Mexico.

Drilling for this well will be on a schedule of 24 hours per day until the well is done, which should be approximately 12 days. The Patterson 743 Rig will drill this well.

Once the drilling is complete, a completion rig will move on the location to complete this well. This completion phase will be on going – on and off, for approximately 30 days, and work will only be done during daylight hours.

If you have any concerns or questions please feel free to call us at the numbers listed below.

Sincerely,

Paul Lehrman  
Land Surface Coordinator  
505-324-1090 Ext. 7907
