13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Pogo Producing Company has failed in its negotiations with the prior operator to determine who will be the ultimate owner of the above captioned well. Pogo Producing Company and the prior operator are headed toward arbitration and possible litigation to solve this matter. Therefore, until the ownership matter is settled, Pogo is reluctant to do anything to change the mechanical condition of the well, especially since Pogo may not be the ultimate owner. We are hopeful that this matter will be resolved within the next several months and therefore request an extension to the required activity date to June 30, 2007.

If Pogo ultimately retains ownership of the well, we will review two options to putting such well into compliance, which were outlined on the Sundry notice filed on April 17, 2006.
