Re: FRPC 22 #2
CCI Old Gravel Pit

30-045-33160

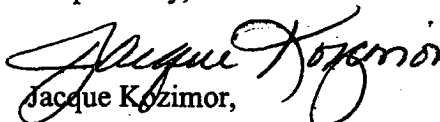

Dear Ms. Jones:

For your information, the material that was hauled to the above referenced Oilfield Location from Consolidated Constructors, Inc Old Gravel Pit was pure material and not contaminated in anyway.

An archaeological study on this material was done by Complete Archaeological Service Associates from Cortez, Colorado. And an endangered species survey was done by Ecogphere Environmental Services from Farmington, New Mexico.

Thank you for your time and consideration concerning this matter.

Respectfully,

Jacque Kozimor,
Secretary
