If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if your are burying in place) onsite offsite If offsite, name of facility _____ (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered: No Yes If yes, show depth below ground surface _____ ft. and attach sample results.

(5) Attach soil sample results and a diagram of sample locations and excavations.

Additional Comments:

Area around BGT silting up and maintenance required. Remove fiberglass tank and replace with steel sub-grade tank. Release discovered when replacing tank. Excavated heavily contaminated soils to below closure standards of 1000ppm TPH, 50ppm BTEX, and 10ppm Benzene. See attached reported. See attached site diagram and soil sample results.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines , a general permit , or an (attached) alternative OCD-approved plan .

Date: 1/26/07

**JICARILLA 93 #4 EXCAVATION
BELOW GRADE TANK REPLACEMENT
AT JICARILLA 93 #4 FOR,
WILLIAMS PRODUCTION
RIO ARRIBA COUNTY, NEW MEXICO**

January 17, 2007

Introduction:

On December 6, 2006, Mr. Michael Lane of Williams Production contacted Cynthia Gray of *iina' ba'* to have soil samples collected at Jicarilla 93 #4 for a below grade tank (BGT) replacement. Instructions were to have field headspace screening performed during excavation of the BGT and below the tank after it's removal. Soil samples were to be collected and analyzed in the *iina' ba'* laboratory for site closure.

Summary of Field Activities:

On December 6, 2006, *iina ba* arrived on site and met with Tommy Clements (Williams Productions) and Sierra Oilfield workers. The facility consists of a wellhead, separator, and a fenced, bermed secondary containment area approximately 51 feet by 22 feet. Located in the secondary containment area is a produced water below grade storage tank (BGT). The Sierra Oilfield crew began excavation around the BGT. Field headspace screening was performed using the MultiRae Photo Ionization Detector (PID) at 2 foot intervals to a depth of 7 feet. The PID was calibrated using 100 parts per million (ppm) isobutylene. All samples were less than 100 ppm. As 10 bbl of produced water was frozen inside BGT, Sierra Oilfield was unsuccessful in removing the tank.

On December 8, 2006, *iina ba* returned to the site, Tommy Clements, the Sierra Oilfield crew and Poor Boys Hot Oil Services from Cuba, NM were in the process of melting the ice in the BGT. A Dawn Trucking water truck arrived on site and vacuumed out the water making it possible for Sierra Oilfield to remove the entire BGT and plastic liner. Field headspace screening was performed at 2 foot intervals from 8 through 12 feet bgs. Field headspace screening yielded a result of 1,341 ppm from the middle of the pit at 12 feet. Michael Lane (Williams Production) was informed by telephone of the results. He requested that excavation cease and soil samples be collected. *iina ba* collected a 5 point composite sample at 12' bgs. The soils were gray, moist sand and had a strong hydrocarbon odor. The composite samples were placed in laboratory-supplied jars, placed on ice and transported to *iina ba*'s laboratory in Farmington, NM, following proper preservation and Chain of Custody protocol.

The laboratory used USEPA Methods SW8015B for Diesel Range and Gasoline Range Organics (DRO/GRO) and SW8021B for Aromatic Volatiles (BTEX), to analyze the soil sample for residual hydrocarbon contamination. The following table and the enclosed laboratory analytical report summarize the results.

Date	Jicarilla 93 #4	DRO mg/Kg	GRO mg/Kg	Benzene µg/Kg	Toluene µg/Kg	Ethyl Benzene µg/Kg	Total Xylenes µg/Kg
12/8/2007	South wall @ 12'	952	16.2	ND	ND	ND	73.5
12/8/2007	West wall @ 12'	5,350	14.1	ND	ND	ND	ND
12/8/2007	North wall @ 12'	1,580	18.7	ND	ND	ND	62.7
12/8/2007	East wall @ 12'	2,580	4.52	ND	ND	ND	ND
12/8/2007	Center of pit @ 12'	12,100	3,920	52.4	17,800	6,200	165,800
12/15/2007	South wall @ 23'	ND	ND	ND	ND	ND	ND
12/15/2007	West wall @ 23'	ND	ND	ND	ND	ND	ND
12/15/2007	North wall @ 23'	ND	6.25	ND	ND	ND	ND
12/15/2007	East wall @ 23'	ND	ND	ND	ND	ND	ND
12/15/2007	Center of pit @ 23'	457	76.1	ND	34.8	117	1,112

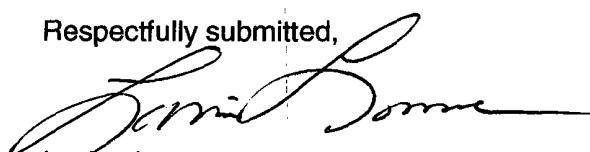

Based on laboratory analytical results, on December 15, 2006, Sierra Oilfield excavated the affected area to a depth of approximately 23 feet bgs, removing 70 cubic yards of soil. The contaminated soils were transported to Tony Smith's Ranch Contaminated Soils in Jicarilla. A tailgate safety meeting was held before work commenced. Field screening was accomplished using the calibrated MultiRae Photo Ionization Detector (PID). Field screening of the sample revealed results at 138 ppm at 23 feet. Michael Lane was informed by telephone; he requested that laboratory samples be collected. *iina ba* collected a 5 point composite sample from all four walls and the bottom of the excavation. The composite sample was placed in a laboratory-supplied jar and placed on ice for transport to *iina ba's* Farmington laboratory. The sample was analyzed by the same methods as the December 8, 2006 sample. Results are summarized in the table above and in the enclosed laboratory report.

Closure and Limits:

The scope of our services consisted of the performance of two soil sampling events, and preparation of this summary. All work has been performed in accordance with generally accepted environmental management professional practices.

This document has been prepared by *iina ba* for the exclusive use of Williams Production, as it pertains to the referenced location. If there are any questions regarding this report, please contact either Cynthia Gray or Lavina Lamone at (505) 327-1072.

Respectfully submitted,

Lavina Lamone

RE: Jicarilla 93 #4

Order No.: 0612035

Dear Lavina Lamone:

iiná bá received 5 samples on 12/16/2006 8:20:00 AM for the analyses presented in the following report.

This certificate of analysis includes the Analytical Report(s) for the sample(s) received by the laboratory. A Quality Control Summary Report, the Sample Receipt Checklist and an executed Chain of Custody are included as an addendum to this report.

Should you have any questions regarding this certificate of analysis, please contact the laboratory at your convenience.

Report Approved By: Jeffrey L. Engels

CASE NARRATIVE

Samples were analyzed using the methods outlined in one or more of the following references:

Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, SW846, 3rd Edition.
Methods for Chemical Analysis of Water and Wastes, EPA-600/4-79-020, March 1983.
Standard Methods for the Examination of Water and Wastewater, 18th Edition, 1992.
Methods for the Determination of Metals in Environmental Samples, Supplement I, EPA-600/R-94/111,
May 1994.

Any quality control and/or data qualifiers associated with this laboratory order will be flagged in the analytical result page(s), the quality control summary report(s) or the sample receipt checklist.

RE: Jicarilla 93 #4

Order No.: 0612015

Dear Lavina Lamone:

iiná bá received 5 samples on 12/8/2006 3:55:00 PM for the analyses presented in the following report.

This certificate of analysis includes the Analytical Report(s) for the sample(s) received by the laboratory. A Quality Control Summary Report, the Sample Receipt Checklist and an executed Chain of Custody are included as an addendum to this report.

Should you have any questions regarding this certificate of analysis, please contact the laboratory at your convenience.

Report Approved By:

Jeffrey L. Engels, Laboratory Manager

Edwina F. Aspaas, Quality Assurance Officer

ORELAP Laboratory No. 100002
Arizona License No. AZ0691

This certificate of analysis and respective material is intended only for the use of the individual(s) or entity to whom it is addressed, and may contain information that is privileged and confidential. If you are not the intended recipient, or the person responsible for delivering this to the intended recipient, you are hereby notified that any dissemination, distribution, or copying of this material is strictly prohibited. If you have received this material in error, please notify the laboratory immediately at (505) 327-1072.

CASE NARRATIVE

Samples were analyzed using the methods outlined in one or more of the following references:

Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, SW846, 3rd Edition.

Methods for Chemical Analysis of Water and Wastes, EPA-600/4-79-020, March 1983.

Standard Methods for the Examination of Water and Wastewater, 18th Edition, 1992.

Methods for the Determination of Metals in Environmental Samples, Supplement I, EPA-600/R-94/111,

May 1994.

Any quality control and/or data qualifiers associated with this laboratory order will be flagged in the analytical result page(s), the quality control summary report(s) or the sample receipt checklist.
