See Sundry Notice dated July 14, 2006. SG is requesting continued Shut-In status for this well until other wells drilled in the area can be de-watered and production potential can be determined (SG is in the process of putting in the pipeline to produce surrounding wells). If it is found that gas can be produced in paying quantities, SG intends to drill this well to a deeper depth (with slim-hole tools) to penetrate the Fruitland Coal Formation and then will complete this well.

Shut-in until 12/31/07
