13. Describe proposed or com	pleted operations. (Clearly	state all	pertinent details, an	d give pertinent da	
of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.					
It is intended to deepen this existing Basin Fruitland Coal well to approximately 3435' - into the Pictured Cliffs formation.					
It is anticipated the Pictured Cliffs is not productive in this wellbore. The existing tubing and liner will be pulled, the hole					
will be circulated clean, additional footage will be drilled (155' which is approx 90' beyond lowest coal interval based on					
the mudlog run on the 32-7 #204A). The hole will again be cleaned and then a reconfigured 5-1/2" 15.5# J-55 liner will be installed from approximately 2005'. A mudlogram will be present to increase Pictured Clifforges in 't approximately 2005'.					
installed from approximately 3005' - 3435'. A mudlogger will be present to insure Pictured Cliffs gas isn't encountered.					
Verbal approval was given by Steve Hayden with the OCD 3/29/07.
