13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Request permission to install a straddle compressor on the abandoned (but not reclaimed) location of Saunders LS#1 (API# 30-039-06284). This is a change from the Sundry Approved 10/31/06 to install 450' of pipeline to connect the compressor to Enterprise Products gathering system. The compressor will lower line pressures at Romero Com #1 and three other wells nearby on the Jicarilla Apache Reservation. The result of lower line pressures will be increased gas production from the four wells. Please see the attached sketch for details. All construction will be in previously disturbed soil on the abandoned Saunders LS#1 location adjoining the Romero Com #1.

Entire abandoned well pad will be recontoured and seeded 90 day after compressor is set ... CDX Rio, LLC will e-mail Mark Kelly 48 hrs before work (rehab) is started.
