13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

When we pulled 5 1/2" liner, bridge plug released from liner. We were unable to fish bridge plug so we drilled beside it (bridge plug @ 3362'). On 4/27/07, drilled 6 1/4" hole to TD 3465', 100' into the Pictured Cliff formation to allow for a sump from which to pump water. We used a mudlogger during drilling to monitor the Pictured Cliff for signs of gas, there were none. We cleaned out new hole, and completed work 5/1/07.

7" casing is unchanged, and set @ 3129'. We ran two joint of 4 1/2", 11.6# liner then six joints of 5 1/2" 15.50# pre-drilled liner, we were unable to get liner to bottom, top of liner @ 3056', bottom of liner landed @ 3444' pre drilled perforations are 3100'-3353' (253 holes). Since we did not get liner to bottom we perforated new liner 3359'-3374' with 60 1/4" holes this gives us a total of 313 perforations to produce from. 2 3/8" tubing run and landed @ 3407'. 3/4" rod string run.

Returned well to production 05/01/2007.
