13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

This well's original APD (filed under HEC Petroleum, Inc.), and its Registering of Drilling Pit, were approved on 11/04 & 11/07 of 2005, respectively, with an extension granted to 11/04/2007 (approved on 09/15/2006), see attached. In preparing to conduct pre-spud and pit construction on or about mid June of this year, we noticed that the Original Registration of Drilling Pit (Form C-103) made reference to "our (HEC) general pit guidelines on file at NMOCD in Aztec, NM". In view of this and the recent Change of Operators (HEC to Chevron Midcontinent, L.P.), Chevron Midcontinent, L.P. wanted to determine what these (HEC) pit guidelines were and, thus, requested your review of what actually was on file in your office.

Your review and response back to us stated that the referenced pit guidelines that are on file are basic and requested that we (Chevron Midcontinent, L.P.) now resubmit a pit permit stating that the drilling pit will be opened and closed adhering to NMOCD guidelines.

Therefore, Chevron Midcontinent, L.P. now respectfully resubmits this Registering of Drilling Permit for your approval. This drilling pit will now be built and lined according to NMOCD guidelines. Upon conclusion of our drilling and completion activities, this pit will also be closed according to NMOCD guidelines. As this well is a Federal well, a copy of this Form C-103 is also being sent to the BLM in Farmington, NM as an attachment to Form 3160-5 for their information and records.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☒ a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
