13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplate in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy requests approval to downhole commingle production from the Basin Dakota (71599) and Blanco Mesaverde (72319) upon completion of drlg. Proposed allocations are based on a 9-section EUR of the surrounding area as:

Basin Dakota:	Oil: 66.67%	Water: 66.67%	Gas: 62.50%
Blanco Mesaverde:	Oil: 33.33%	Water: 33.33%	Gas: 37.50%

Ownership in these pools is common and notice to owners was unnecessary. Downhole commingling will offer an economical method of production while guarding against reservoir damage, waste of reserves & protection of correlative rights. The NMOCD was notified of our intent via form C103 on 5/31/2007
