13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Operator is not authorized to plug and abandon this well. The well is within the San Juan Coal Company (SJCC) underground mine area. Dugan Production Corp. is working on an agreement with SJCC that will make it their responsibility to plug any wellbores they encounter. The assumption of plugging responsibility by SJCC is necessary to meet safety requirements for mining through oil and gas wells. We will petition the NMOCD to allow us to produce this well, as a second well in the spacing unit, until the time that it must be plugged to meet mine timing.
