We wish to temporarily abandon the well based on the pressure test attached to this sundry. We moved a rig on this well in August 2003 and set a CIBP @ 4600' and dumped 50' of cement on top. See attached wellbore diagram. We pressure tested the wellbore on September 19, 2003 using a 1000# spring and a 96 minute clock. We pressured the wellbore up to 1000# and SI the wellbore for 58 minutes with no pressure loss and bled the pressure to 480# and held that pressure for 42 minutes before bleeding the pressure to zero.
