SFPRR No. 15

2405' FNL & 2805' FEL, Section 29, T16N, R6W

McKinley County, NM

8/13/2002: Rig up JC Well Service. Pick up tubing to trip out. Had to work packer to release. During trip out the packer set. Pulled the rest of the tubing and did not recover packer. Trip in with 2 3/8" tubing work string. Packer had dropped to bottom. Could not screw on to packer. Tagged PBD (packer) at 746'.

8/14/2002: Tried to screw into packer again but was not successful. Roll hole with water. Mix and spot 25 sack bottom plug with 2% CaCl<sub>2</sub> at 746'. Trip out tubing and WOC 3 hours. Tag plug at 474'. Casing would not hold pressure. Perforate squeeze holes at 100'. Trip in 5 joints tubing to 155' and pumped cement to fill casing. Squeezed the rest of the cement to circulate cement to surface. Pumped 35 sacks total. Trip out tubing. Rigged down. Henry Villanueva with OCD was on location throughout job and approved cement volumes. Class B cement was used.

Installed abandonment marker and backfilled pit. Cleaned up location.
