Re: Penn Building "B" 1
Test Well.

Dear Sir:

Enclosed please find executed forms in triplicate of form C-103 Report on Beginning Drilling Operations and form C-102 Notice of Intention To Test Casing Shut-off.

In addition to drilling the Penn "B" Lease we have commenced operations at Derby Drilling Company No. 1 Jicarilla Apache located SE NE NE Section 33-Twp. 28N Range 1E, Rio Arriba County. This well is on Indian Lands and the USGS has advised us to make our reports to them on this well. Since it is in the area in which you are interested thought I would pass along the information to you. We ran and cemented 130 feet of 12 $\frac{1}{2}$ " surface pipe with 125 sacks of cement. We expect to start under surface on this well tonight or tomorrow. It is anticipated that this test will be drilled to a depth below 6000'.

When you are over this way drop in and see us.

Sincerely yours

Southwestern Exploration Company
