The elevation of the ~~drill hole~~ ^{Ground} above sea level is 5229 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill this well with cable tools to a total depth of approximately 900 feet, test first, second and third Dakota sands if necessary, for oil production. Will set approximately 95 feet of 9 5/8" OD, 40# casing as surface pipe and will set 7" OD casing as an oil string.
