- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy proposes to downhole commingle the Basin Dakota (71599) and the Wildcat Basin Mancos (97232) upon completion of drilling. Allocations for pools is based upon daily production testing on the Federal H #1F. The Mancos and Dakota were tested separately and allocations proposed as follows:

Basin Dakota:	Oil: $33\frac{33}{100}\%$	Water: 40%	Gas: $70\frac{14}{100}\%$
Wildcat Basin Mancos:	Oil: $66\frac{67}{100}\%$	Water: 60%	Gas: $29\frac{86}{100}\%$

Ownership in these pools is common and notice to owners was unnecessary. Downhole commingling will offer an economical method of production while guarding against reservoir damage, waste of reserves and protection of correlative rights. The NMOC was notified of our intent to downhole commingle via submittal of form C103 and C107A.
