13. Describe Proposed or Completed Operations

It is intended to deepen this existing Basin Fruitland Coal well to approximately 3467' into the Pictured Cliffs formation. It is anticipated that the Pictured Cliffs is not productive in this wellbore. The existing tubing and liner will be pulled, the hole will be circulated clean. The well will be drilled to new total depth. The wellbore will be cleaned out. The 5 1/2" 15.5# K-55 liner will be rerun at approximately 3181-3466'. Tubing will be rerun and the well returned to production.
