OIL CONS. DIV.

13. Describe Proposed or Completed Operations

DIST. 3

ConocoPhillips wishes to use the subject well's location as a staging area for approx. 14 frac tanks of +32 tanks that will be use on a multi-well completion that is planned for the near future. We will be setting up the tanks approx. the last week in September and may need the temporary use area until the last week of October. There are three wells located in Unit Letter O of Section 12, T28N, R5W that will be completed concurrently. There will be no new disturbance involved with the placement of these 14 tanks since the well was recently drilled and the reclamation hasn't taken place yet. Once the tanks are removed the reclamation is planned to be completed before the winter closure date of December 1. We will inform the BLM once these tanks have been removed and the area has been cleared and ready for reclamation.

14. I hereby certify that the foregoing is true and correct.
