Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent dates, including estimated date of starting any proposed well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to th

Plans are to install a verticle cathodic ground bed within the limits of
of Blackwood & Nichols existing pipeline right-of-way, (Serial No. NM 80897).

The ground bed will be approximately 100 feet South of the existing Middle Mesa CPD Site,
as shown on the attached map in the NWNW, Section 15, T31N-R7W. The purpose of the ground
bed is to provide cathodic protection for the NEBU 484 well casing as well as the
pipelines associated with the CPD Site. The ground bed will be drilled within the previously
disturbed pipeline right-of-way with a small truck mounted rig. A pit will not be
required for the drilling of this ground bed. This project will be located on Bureau-
of Land-Management-lands. STATE
