13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

On 8/29/2007 BP America requested permission to T&A the MV & DK portion of said well and complete uphole into the Otero Chacra formation. Permission was granted 9/17/07. Said work has not been completed. BP requests permission to drill out future bridge plug and Tri-mingle production downhole in the Chacra, MV & DK formations.

The Basin Dakota (71599) & Chacra (82329) Pools are Pre-Approved for Downhole Commingling per NMOCD Order R - 11363. The working interest, royalty & overriding interest owners are the same in the proposed commingled pools; but some of the interest owners have different percentages between the Chacra & Dakota formations therefore notification was sent certified return receipt 9/7/07.

Production is proposed to be based on a subtraction method, using the projected future decline for production from the DK pool. This production shall serve as a base for production subtracted from the total production for the commingled well. The balance of the production will be attributed to the Chacra. Please see the decline for DK attached.

BLM (lease SF-078499) has been notified.

Commingling Production Downhole in the subject well from the proposed pools will not reduce the value of the total remaining production (Chacra plat sent previously)
