13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Upon completion of the planned lateral drill design along with the additional side lateral, it was determined that the portion of lateral lined includes the main lateral up to the junction of the main lateral and side lateral and the portion of the side lateral as indicated on the final directional drilling survey. This lateral showed to be unproductive due to wellbore construction problems.

A third lateral was drilled by setting a whipstock and milling a window as indicated on a subsequent sundry. This lateral was drilled according to the directional wellplan submitted with the afore mentioned sundry. This lateral was drilled to 5915' MD with a BHL of 1553 fnl, 1924 fwl of Section 29, T32N, R4W.
