13. Describe Proposed or Completed Operations

DIST. 3

Burlington Resources is requesting the following change on the well design:

11/13/07

Notified Steve Mason (BLM) that we had 4 1/2" casing in open hole, with casing between 7518' - 3274'. 7" shoe @ 3267'.
Notified Wayne Townsend (BLM) that plan of action given by Steve Mason would not work as the casing was blown out at approx. 3274' to try to recover as much casing as possible. Mr. Mason suggested they try to tie into the 4 1/2" casing and pump cement inside and outside casing. We believe the casing is damaged, and the top of the fish is warped and we would be unable to latch on to the 4 1/2" casing therefore we request to:

Set cement retainer in 7" casing at approximately 3250', bullhead cement and whipstock. Cut hole in 7" window in the Lewis Shale. The intermediate casing is set in the Lewis Shale, this well is commingled and the Chacra is not productive.

Verbal approval to proceed given by Wayne Townsend (BLM) and Henry Villanueva (OCD).

CONDITIONS OF APPROVAL

Adhere to previously issued stipulations.

14. I hereby certify that the foregoing is true and correct.

Signed Tracey N. Monroe
