13 Describe Proposed or Completed Operation (clearly state all pertinent details including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths or pertinent markers and sands. Attach the Bond under which the work will be performed or provide the Bond No on file with the BLM/ BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notice shall be filed only after all requirements, including reclamantion, have been completed, and the operator has determined that the site is ready for final inspection.)

Chevron Midcontinent respectfully reports the spud of the above mentioned well on 10/15/2007 at approximately 03:30 hours. The spud was called into Henry Villanueva at the NMOC and to the BLM 24 hour cement hotline on 10/14/2007. Chevron began to drill the 12 1/4" surface hole to 379' and ran 9 5/8" 36# J55 LTC surface casing to 377'. We cemented surface casing with 49 bbls (230 sxs) of class G 15/6 ppg with 1.20 yield cement, returning 15 bbls (70 sxs) of cement to 0' (surface). On October 16, 2007, the wellhead was tested to 1800 psi for 10 mins with good results. The casing was tested at 1000 psi for 30 mins also with good results.
