Black Hills Gas Resources (BHGR) has concluded that the Dakota section to be largely unprospective in 5 wells drilled during 2005 and 2006. It is therefore requested that the Proposed Total Depth of the subject well be raised such that the Greenhorn Limestone Member of the Mancos Formation will not be penetrated. This will allow evaluation of the Mancos / Gallup and shallower formations.

The proposed TD depth will change from 8661bgs to 8150 bgs.
