13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. proposes to amend surface commingle PLC-260 by adding the Wildcat Basin Mancos (97232) to the commingling of production. There are currently 25 wells in Township 27N, Range 11W commingled under Order PLC-260. By producing gas through a central compressor we will lower operating expenses & extend the economic life of the wells, thus increasing their ultimate recoveries on all Indian & non-Indian leases.

The only fuel requirements are for ppg unit engines, separators & for compressor engines. There are no bypass gas lines for this system. Each well is equipped w/an allocation meter maintained by XTO Energy in accordance w/State & Federal Regs. To ensure system integrity, all flowlines are pressure tested appropriately. Produced liquids are not surface commingled. All interest owners have been notified via certified mail, return receipt on September 27, 2007.

Attached are supporting documents for this proposal to add the Fullerton Federal 5F to PLC-260.
