SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to re-enter an abandoned well. Use Form 3160-3 (APD) for such proposals.

SUBMIT IN TRIPLICATE - Other instructions on page 2

1. Type of Well
☐ Oil Well ☒ Gas Well ☐ Other2. Name of Operator
XTO Energy Inc.3a. Address
382 CR 3100 Aztec, NM 874103b. Phone No. (include area code)
505-333-32044. Location of Well (Footage, Sec., T., R., M., or Survey Description)
963' ENL & 1012' FWL NWNW SEC 5 (D) - T26N-R11W

5. Lease Serial No.

NM-0359212

6. If Indian, Allottee or Tribe Name

RCVD MAR 21 '08

7. If Unit or CA/Agreement, Name and/or No.

OIL CONS. DIV.

8. Well Name and No.

HENDESON 5 #3

9. API Well No.

30-045-32588

10. Field and Pool, or Exploratory Area
BASIN FRUITLAND COAL

11. County or Parish, State

SAN JUAN NM

12. CHECK APPROPRIATE BOX(ES) TO INDICATE NATURE OF NOTICE, REPORT, OR OTHER DATA

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

A liner hanger failure occurred when initially setting the production liner in this well. A gauge ring trip was made to determine whether or not the expandable liner hanger was set. Once it was determined that it was not set, the liner was retrieved using a fishing spear. While making a clean-out run prior to re-running the liner, great difficulty was encountered getting the directional drilling BHA past 3110'. A second hole was drilled parallel to the the original hole from this point to reported TD. On the second attempt to run the production liner it continued to tag at 3110'. A final clean out attempt was made and it was determined that there was a great deal of formation instability from 2945' - 3170'. The final run of the liner resulted in a pre-perforated liner being set to a depth of 1716' - 2947'. The open-hole completion of the well runs from 2947' - 4967'.
