13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. requests approval for an exception to NMOC Rule 303-C to permit DHC of production from the Basin Dakota & the Wildcat Basin Mancos in the Martin Gas Com E #1F. The allocations for this well will be the same as the Federal H #1F that is in the same 9-section EUR & are as follows:

Mancos:	Oil: 66.67%	Water: 60%	Gas: 29.86%
Dakota:	Oil: 33.33%	Water: 40%	Gas: 70.14%

The pools are not included in the New Mexico Oil Conservation Division pre-approved pool combinations for downhole commingling in the San Juan Basin; therefore, a C-107A will be submitted. Interest owners are common and notification to owners was not necessary. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves & violation of correlative rights.
