If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This is in response to your 3-4-94 letter: This well has recovered 640 MMCF. The producing history of this well indicates that a reasonable payout for the expense of installing a compressor to restore production could be achieved. We would like to maintain this well in a TA status for 1994 while evaluating the prospects for installing a compressor to restore production.
