13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

The well Richardson #102 was permitted with 7" 20# K-55 set at 120' and cemented to surface. This casing string will be changed to 8 5/8" 32# K-55 but still set at 120' and cemented to surface. The production string was permitted at 4 1/2" 10.5# K-55 set at 1545' and cemented to surface. The setting depth or cementing will not change but the casing will be changed to 5 1/2" 14# K-55. Due to these changes the hole sizes will be increased to 12 1/4" for the surface hole and 7 7/8" for the production hole. Cement volumes have been changed to reflect these changes and still provide 100% excess in both hole sections.
