<input type="checkbox"/> Subsequent Report	<input type="checkbox"/> Plugging	<input type="checkbox"/> Non-Routine Fracturing
	<input type="checkbox"/> Casing Repair	<input type="checkbox"/> Water Shut off
<input type="checkbox"/> Final Abandonment	<input type="checkbox"/> Altering Casing	<input type="checkbox"/> Conversion to Injection

☒ Other - Tubeless Production

13. Describe Proposed or Completed Operations

Burlington Resources requests permission to produce this well without tubing until the well falls below critical lift and is not able to lift liquids through the 4 1/2" casing. At that point, tubing will be installed and the well returned to production with tubing in the hole.

The procedures did not specifically state that the well would be returned to production without tubing, so no NOI was issued. Workover rig moved off this well on 4/3/08, well was returned to production on 4/15/08 and is capable of flowing on its own. Currently production is at 2000 mcf/d.

5/1/08 Verbal approval was received from Henry Villanueva OCD to continue to produce this well without tubing.
