13. Describe Proposed or Completed Operations

The subject well will have a fence installed for safety reasons. This is the first of a 204 well project that we have visited with the BLM about. This well will be painted to match the existing facilities on location. This will be the test well to determine if it is visually as well as cost effective to paint the fencing to match the facilities. Attached is a site diagram showing how the fence will be laid out. The fencing standards and map depicting the wells to be included has been submitted to the BLM for approval.
