13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

High Plains Operating Company, LLC (HPOC) is operating with Bond No. NMB 000457.

HPOC sold the first load of Entrada oil from its Eagle Springs 8 Federal #2M well on March 14, 2008. API gravity is 38 degrees. The oil was sold to Western Refining and hauled to their refinery in Bloomfield, New Mexico. There is one oil tank on location with Tank ID GI 11116.

HPOC attempted to bring this well into production in December of 2007, however extremely cold temperatures and the high pour point (80 degrees F) of this crude, along with other start-up issues, prevented continuous production operations until March 12, 2008.

The well is currently being pumped with a progressive cavity pump (PCP).
