13 Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Elm Ridge Exploration reached a TD of 1500' on June 19, 2008. On June 20, we ran 30 joints of 5 1/2" 15 5# J-55 down a 7 7/8" hole, casing landed at 1458'. We then mixed and pumped 185 sks of class G Premium cement with 2% Econolite, 5# Gilsonite and 1/8# polyflake for the first stage of cementing. The second stage of cementing consisted of 125 sks of Type G cement with 2% calc, 5# Gilsonite and 1/8# polyflake, circulated 15 bbls of good cement to pit. Pressure tested well to 1500 PSI for 30 plus minutes.

good test?
