The production casing will be cemented to surface using a lead slurry of low density cement having a yield of 2.25 cf/sk (2800) and a tail slurry of Standard cement with a yield of 1.24 cf/sk (1000 fillup) with an excess of caliper plus 25% in both slurries. This will provide 1000 of high strength cement across the Fruitland Coals that may be encountered.
