## 13. Describe Proposed or Completed Operations

Burlington Resources APD for the intermediate setting depth as 4423', but have determined that we need to set the intermediate @ 5802 (MD) 5582' (TVD). There is an existing well nearby that requires us to angle the hole slightly southwesterly at the first To make sure that the nearby wellbore isn't intersected. This is to facilitate DD torque & drag issues. Revised csg design is from 7", 23# L-80 LT&C to 7", 23#, J-55 LT&C. Cement will be adjusted accordingly. ✓
