13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximated duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc request approval to add a 13-3/8" conductor and set the surface casing deeper than originally proposed in the APD.

XTO Energy recently drilled a fruitland coal well approx 100 yds north of this location and encountered a prolific fresh water flow at 550' to 600' from surface. Due to the depth of the surface casing (225') on the coal well, 10.5 ppg mud was needed to finish the well to TD.

In order to avoid drilling with weighted mud, XTO Energy plans to set 13-3/8". 48.0#, H-40 conductor casing to 60-80'. The conductor casing will be cemented with +- 100 sx type III cement. 8-5/8", 24#, J-55 STC surface casing will be set @ 750' with +- 450 sx Type III cement. Cement will be circ to surf on both pipe jobs.

After surface is set, the well will be drilled to TD as originally proposed.
