	<input type="checkbox"/> Altering Casing	<input type="checkbox"/> Conversion to Injection

☒ Other — deepen for sump

13. Describe Proposed or Completed Operations

Burlington proposes to deepen this well. The current TD is 3150' and we would like to drill down to about 3250'. This well is just outside the La Jara pool and we do not anticipate any sustained gas flow from the PC, but we will use a mud logger to monitor the gas liberated drilling. This is located in the NE/4 of Section 26 of 30N, 7W. The additional footage will allow us to have a 100' sump below the coal for an improved operational configuration. *P.C. non-prod; sump request granted 10/21/08 GEH*

14. I hereby certify that the foregoing is true and correct.
