☐ Altering Casing ☐ Conversion to Injection
☒ Other

13. Describe Proposed or Completed Operations

As discussed with A.O. Bill Leiss, facilities will need to be set at the southeast corner of the well pad (corner 2) in order to avoid a pipeline which is located near the center of the location. As a result of placing the facilities in the southeast corner, the construction zone behind the equipment cannot be re-contoured back to original contour but a minimum of 2:1 slope shall be attained.
