Form C-144 CLEZ
July 21, 2008

For closed-loop systems that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, submit to the appropriate NMOC District Office.

2578

Closed-Loop System Permit or Closure Plan Application

(that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure)

Type of action: ☒ Permit ☐ Closure ☐ Modification

Instructions: Please submit one application (Form C-144 CLEZ) per individual closed-loop system request. For any application request other than for a closed-loop system that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, please submit a Form C-144.

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

1. Operator: <u>Dugan Production Corp</u> OGRID #: <u>006515</u> <u>PCUN NOV 19'08</u>	
Address: <u>P.O. Box 320 Farmington, NM 87499</u> <u>Oil Cons. Div.</u>

7. **OCD Approval:** ☒ Permit Application (including closure plan) ☐ Closure Plan (only)

OCD Representative Signature: *David J. Bell* Approval Date: 12-3-08

Title: Enviro/Spec OCD Permit Number: _____

8. **Closure Report (required within 60 days of closure completion):** Subsection K of 19.15.17.13 NMAC

Instructions: Operators are required to obtain an approved closure plan prior to implementing any closure activities and submitting the closure report. The closure report is required to be submitted to the division within 60 days of the completion of the closure activities. Please do not complete this section of the form until an approved closure plan has been obtained and the closure activities have been completed.

☐ Closure Completion Date: _____

9. **Closure Report Regarding Waste Removal Closure For Closed-loop Systems That Utilize Above Ground Steel Tanks or Haul-off Bins Only:**

Instructions: Please identify the facility or facilities for where the liquids, drilling fluids and drill cuttings were disposed. Use attachment if more than two facilities were utilized.

Disposal Facility Name: _____ Disposal Facility Permit Number: _____

Disposal Facility Name: _____ Disposal Facility Permit Number: _____

Were the closed-loop system operations and associated activities performed on or in areas that *will not* be used for future service and operations?

☐ Yes (If yes, please demonstrate compliance to the items below) ☐ No

Required for impacted areas which will not be used for future service and operations:

☐ Site Reclamation (Photo Documentation)

☐ Soil Backfilling and Cover Installation

☐ Re-vegetation Application Rates and Seeding Technique

10. **Operator Closure Certification:**

I hereby certify that the information and attachments submitted with this closure report is true, accurate and complete to the best of my knowledge and belief. I also certify that the closure complies with all applicable closure requirements and conditions specified in the approved closure plan.

Dugan Production Corp
Closed Loop System Proposal
Stella Needs A Com SWD 1, K-S.36-T.30N-R.14W
API 30-045-08994
Plug to Abandon

MODIFICATION OF ORIGINAL PLAN DESIGN TO INCLUDE THE POSSIBILITY OF WATER STORAGE ON LOCATION IN A FRAC TANK.

Closed-Loop Design Plan:

Dugan Production proposes to use a closed loop circulating system to contain well bore fluid and cement generated during the plugging to abandon procedure on the subject well. The system will not entail any drying pad, temporary pit, below grade tank or sump. The system will consist of an above ground tank with adequate volume to hold all fluid generated during the operation.

1. Fencing is not required for an above ground closed-loop system.
2. Signage in compliance with 19.15.3.103 NMAC will be present.
3. Water will be contained in either a water truck or a 500 bbl frac tank.

Closed-Loop Operating and Maintenance Plan:

The subject closed-loop system will be operated and maintained to contain liquids and solids in order to prevent contamination of fresh water sources, and to protect public health and the environment. To ensure that the operation is maintained, the following steps will be followed:

1. The fluids will be vacuumed out and disposed of at the Dugan Production operated Sanchez O'Brien 1 SWD (permit SWD-694) located 1650' fsl and 990' fwl L-Sec.6-Twn.24N-Rng.9W. Solids in the closed loop system will be vacuumed out and disposed of at either the Envirotech facility (permit NM-01-0011) located in Sec.6-Twn.26N-Rng.10W or the IEI facility (permit NM-01-0010B) located in Sec.2-Twn.29N-Rng.12W.
2. No hazardous waste, miscellaneous solid waste or debris will be discharged into or stored in the tank. Only fluids or cuttings used or generated by operations associated with this procedure will be placed or stored in the tank.
3. The division district office will be notified within 48 hours of the discovery of compromised integrity of the closed-loop tank. Upon the discovery of the compromised tank, repairs will begin immediately.
4. All the above operations will be inspected daily and a log will be signed and dated.

Closed-Loop Closure Plan:

The closed-loop tank will be closed in accordance with 19.15.17.13. This will be done by transporting cuttings and all remaining material to the Envirotech facility (permit NM-01-0011) located in Sec.6-Twn.26N-Rng.10W or the IEI facility (permit NM-01-0010B) located in Sec.2-Twn.29N-Rng.12W. All remaining liquids will be transported and disposed of at the Dugan Production operated Sanchez O'Brien 1 SWD (permit SWD-694) located 1650' fsl and 990' fwl L-Sec.6-Twn.24N-Rng.9W.
