Describe Proposed or Completed Operations**

Paul Nguyen (Production Engineer) met with Jim Lovato (BLM) on 1/20/09 and the following was decided upon:

After collecting the Noise Log Data, we were able to tell the origin of the gas and water migration. Danny Seip from Blue Jet interpreted the data for us at this meeting. It was decided to cement squeeze this well to block the migration from the Mesa Verde Zone to the surface. Jim Lovato gave an extension for repair in order to process the current procedure, once the procedure is ready, an NOI will be submitted. Jim Lovato also gave us an exemption on MIT because he agrees that there's no communication between the production casing and the bradenhead when looking at the Bradenhead Test Report.

Verbal approval by Kelly Roberts OCD on 1/22/09
